Milestone 1

ITIS5166
Mitchell Bath
Milestone 1

Home page, Trade Board, Trade, and New Trade pages respectively

Additional features: I discovered a neat trick to have the user navigation buttons (new trade, login, and sign in) to remain in place as the user scrolls down the page. This isn't especially useful yet as only the Home page had a scrollbar at 100% zoom on my 1080p monitor, but it is a cool functionality!

Mitchell Bath
Milestone 1

Status: My HTML and CSS pages are functional and look presentable. I'm not entirely satisfied with the color scheme and logo, but the placeholders are consistent and the blue theme is pleasing enough on the eye. I plan to update these as necessary throughout the project.
